Introduction and How To Use This Guide

Fact is... ChatGPT Can Dramatically *INCREASE* Your Profits

It truly IS a revolutionary resource!

What is SO cool about it is it remembers each query you ask, and “learns” and fine-tunes more of what you want to get.

Imagine that you had a tireless mentor who was willing to spend hours and hours to answer any question you might have. Gold!

But here’s the thing. ChatGPT’s data goes up ONLY to 2021. So to REALLY add the value in to your products or money-making efforts, you need to review data from 2022 as well. And once you have done *that*, you can sit down with ChatGPT and brainstorm to your heart’s delight.

So here’s how to use this product.

For each niche, you’ll be provided with point-and-click resources that return you:

ChatGPT Power GOLD
Introduction and How To Use This Guide

- Google's How-Tos about the niche during the past year
- Google's Forums about the niche during the past year
- Google's Questions about the niche during the past year
- The latest Amazon products in your niche
- The latest eBay auctions listed in your niche
- And ummm... what Etsy returns regarding your niche (it can be amazingly useful!).

Once you have reviewed that info, you'll have a much better feel for profiting within your niche *today* And can then start your conversation with ChatGPT.

Now, remember that Product Brainstorming Case Study in "ChatGPT Made Mighty!"?

That was an actual conversation between me and ChatGPT...

... and you can see how both I and, well, ChatGPT, customized our responses to each other based upon the guidance we both gave.

Well!

I took some of those prompts out and wrote software that would give me a "script" for each of those 425 niches...

... a script that YOU can now use yourself!

Aaaaand you can now go back and look through my personal Case Study (there's always a method to me madness) and see how ChatGPT convinced *me* that its suggestion actually made sense based upon *my* personal preferences – it had first suggested I create a “curated list of resources,” and I responded:

“Problem with that is I cannot sell a collection of high-quality links, while I CAN sell an actual product. How do you suggest this can be achieved?”

The response?

Something that sounded like a suspiciously like a Membership site! Recurring income for the win!

Wow.

So with that as an introduction, it's time now for YOU to put ChatGPT thru its own paces via the scripts provided here!

Ready for the adventure?

Alrighty then, go back to the Table of Content, pick a niche that interests you, click on that link and you'll be brought directly TO that niche script (and more!).

Oh, and I *do* hope you're holding onto your socks...

... Because they're about to be knocked off bigtime! 😊

Let's go!

Alrighty! NOW you have enough data and information at your fingertips to start using ChatGPT and brainstorm a Bass Fishing product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Bass Fishing Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Bass Fishing. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Bass Fishing product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).

5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Bass Fishing product to do.
7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
9. Now list each bullet point followed by the benefit it gives the user, please.
10. Please make each bullet point and benefit shorter and more exciting. Thank you.
11. This is great! Another question - I want my website and Bass Fishing products to rank high. What are the top 20 keywords I should focus on?
12. Please share 20 OTHER ways I can drive traffic to my website.
13. Thanks! What are some of the BEST social platforms to do the above (especially if my customers are young, old, computer savvy, etc)
14. Regarding promoting my product, how would email marketing help?
15. What would be some good call to actions for my product when doing email marketing? (NOTE - if responses are too generic, ask ChatGPT to target suggestions to your product)
16. Thank you! Next, what would be the best kinds of images to use to market my Bass Fishing product?
17. What would be the best way to use AI to make those images?
18. And what would be some good prompts to feed into an AI image generator?
19. Please provide me with 20 ways people could make money with my product. Thank you!
20. Can you also tell me where I can go to learn everything about Bass Fishing?
21. Finally, what do you think my next steps should be, knowing my product is about Bass Fishing?
22. Thank you for your time! I really appreciate it.

And that is ALL that is required to use ChatCPT to help brainstorm your Bass Fishing product; ask questions and finetune. Remember, ideas are just that. Ideas. It is the actions that count! **Take action and make it GREAT.**

Castanets ChatCPT Product and Money Brainstorming Ideas

start using ChatGPT and brainstorm a Castanets product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Castanets Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Castanets. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Castanets product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Castanets product to do.
 7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
 8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
 9. Now list each bullet point followed by the benefit it gives the user, please.
 10. Please make each bullet point and benefit shorter and more exciting.
Thank you.
 11. This is great! Another question - I want my website and Castanets products to rank high. What are the top 20 keywords I should focus on?
 12. Please share 20 OTHER ways I can drive traffic to my website.

Alrighty! NOW you have enough data and information at your fingertips to start using ChatGPT and brainstorm a Cooking product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Cooking Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Cooking. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Cooking product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Cooking product to do.
 7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
 8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
-

9. Now list each bullet point followed by the benefit it gives the user, please.
10. Please make each bullet point and benefit shorter and more exciting.

11. This is great! Another question - I want my website and Cooking products to rank high. What are the top 20 keywords I should focus on?
12. Please share 20 OTHER ways I can drive traffic to my website.
13. Thanks! What are some of the BEST social platforms to do the above (especially if my customers are young, old, computer savvy, etc)
14. Regarding promoting my product, how would email marketing help?
15. What would be some good call to actions for my product when doing email marketing? (NOTE - if responses are too generic, ask ChatGPT to target suggestions to your product)
16. Thank you! Next, what would be the best kinds of images to use to market my Cooking product?
17. What would be the best way to use AI to make those images?
18. And what would be some good prompts to feed into an AI image generator?
19. Please provide me with 20 ways people could make money with my product. Thank you!
20. Can you also tell me where I can go to learn everything about Cooking?
21. Finally, what do you think my next steps should be, knowing my product is about Cooking?
22. Thank you for your time! I really appreciate it.

Alrighty! NOW you have enough data and information at your fingertips to start using ChatGPT and brainstorm a Insect product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Insect Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Insect. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
-

3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Insect product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Insect product to do.
 7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
 8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
 9. Now list each bullet point followed by the benefit it gives the user, please.
 10. Please make each bullet point and benefit shorter and more exciting. Thank you.
 11. This is great! Another question - I want my website and Insect products to rank high. What are the top 20 keywords I should focus on?
 12. Please share 20 OTHER ways I can drive traffic to my website.
 13. Thanks! What are some of the BEST social platforms to do the above (especially if my customers are young, old, computer savvy, etc)
 14. Regarding promoting my product, how would email marketing help?
 15. What would be some good call to actions for my product when doing email marketing? (NOTE - if responses are too generic, ask ChatGPT to target suggestions to your product)
 16. Thank you! Next, what would be the best kinds of images to use to market my Insect product?
 17. What would be the best way to use AI to make those images?
 18. And what would be some good prompts to feed into an AI image generator?
 19. Please provide me with 20 ways people could make money with my product. Thank you!
 20. Can you also tell me where I can go to learn everything about Insect?
 21. Finally, what do you think my next steps should be, knowing my product is about Insect?
 22. Thank you for your time! I really appreciate it.

Lens Finder ChatCPT Product and Money Brainstorming Ideas

Alrighty! NOW you have enough data and information at your fingertips to start using ChatGPT and brainstorm a Lens Finder product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Lens Finder Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Lens Finder. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Lens Finder product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Lens Finder product to do.
 7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
 8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
 9. Now list each bullet point followed by the benefit it gives the user, please.
 10. Please make each bullet point and benefit shorter and more exciting. Thank you.
 11. This is great! Another question - I want my website and Lens Finder products to rank high. What are the top 20 keywords I should focus on?
 12. Please share 20 OTHER ways I can drive traffic to my website.

 14. Regarding promoting my product, how would email marketing help?
 15. What would be some good call to actions for my product when doing email marketing? (NOTE - if responses are too generic, ask ChatGPT to target suggestions to your product)
 16. Thank you! Next, what would be the best kinds of images to use to market my Lens Finder product?
 17. What would be the best way to use AI to make those images?
 18. And what would be some good prompts to feed into an AI image generator?
 19. Please provide me with 20 ways people could make money with my product. Thank you!
 20. Can you also tell me where I can go to learn everything about Lens Finder?

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Macgyver Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

Macgyver ChatCPT Product and Money Brainstorming Ideas

So let us begin! (and yes, I do try to make my interactions polite).

 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Macgyver product to do.
 7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
 8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
 9. Now list each bullet point followed by the benefit it gives the user, please.
 10. Please make each bullet point and benefit shorter and more exciting. Thank you.
 11. This is great! Another question - I want my website and Macgyver products to rank high. What are the top 20 keywords I should focus on?

 17. What would be the best way to use AI to make those images?
 18. And what would be some good prompts to feed into an AI image generator?

Alrighty! NOW you have enough data and information at your fingertips to start using ChatGPT and brainstorm a Ninjutsu product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Ninjutsu Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Ninjutsu. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Ninjutsu product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Ninjutsu product to do.

7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
9. Now list each bullet point followed by the benefit it gives the user, please.
10. Please make each bullet point and benefit shorter and more exciting. Thank you.
11. This is great! Another question - I want my website and Ninjutsu products to rank high. What are the top 20 keywords I should focus on?
12. Please share 20 OTHER ways I can drive traffic to my website.
13. Thanks! What are some of the BEST social platforms to do the above (especially if my customers are young, old, computer savvy, etc)
14. Regarding promoting my product, how would email marketing help?
15. What would be some good call to actions for my product when doing email marketing? (NOTE - if responses are too generic, ask ChatGPT to target suggestions to your product)
16. Thank you! Next, what would be the best kinds of images to use to market my Ninjutsu product?
17. What would be the best way to use AI to make those images?
18. And what would be some good prompts to feed into an AI image generator?
19. Please provide me with 20 ways people could make money with my product. Thank you!
20. Can you also tell me where I can go to learn everything about Ninjutsu?
21. Finally, what do you think my next steps should be, knowing my product is about Ninjutsu?
22. Thank you for your time! I really appreciate it.

And that is ALL that is required to use ChatCPT to help brainstorm your Ninjutsu product; ask questions and finetune. Remember, ideas are just that. Ideas. It is the actions that count! **Take action and make it GREAT.**

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Photography. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.

 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Photography product to do.

Alrighty! NOW you have enough data and information at your fingertips to start using ChatGPT and brainstorm a Polo product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Polo Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Polo. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?

4. I would also like my Polo product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Polo product to do.
7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
9. Now list each bullet point followed by the benefit it gives the user, please.
10. Please make each bullet point and benefit shorter and more exciting. Thank you.
11. This is great! Another question - I want my website and Polo products to rank high. What are the top 20 keywords I should focus on?
12. Please share 20 OTHER ways I can drive traffic to my website.
13. Thanks! What are some of the BEST social platforms to do the above (especially if my customers are young, old, computer savvy, etc)
14. Regarding promoting my product, how would email marketing help?
15. What would be some good call to actions for my product when doing email marketing? (NOTE - if responses are too generic, ask ChatGPT to target suggestions to your product)
16. Thank you! Next, what would be the best kinds of images to use to market my Polo product?
17. What would be the best way to use AI to make those images?
18. And what would be some good prompts to feed into an AI image generator?
19. Please provide me with 20 ways people could make money with my product. Thank you!
20. Can you also tell me where I can go to learn everything about Polo?
21. Finally, what do you think my next steps should be, knowing my product is about Polo?

Woodworking ChatCPT Product and Money Brainstorming Ideas

Alrighty! NOW you have enough data and information at your fingertips to start using ChatGPT and brainstorm a Woodworking product.

First, [login into ChatGPT here](#). Patiently copy and paste each line that follows into ChatGPT. If you like the response, continue; if not, ask ChatGPT for other ideas. By doing this, you will be customizing a Woodworking Product Concept AND also will get great ideas on how to market it.

Couple of things. You are meant to fill in anything in parenthesis (so you can really fine-tune it). And you are encouraged to ask additional questions whenever they occur to you.

So let us begin! (and yes, I do try to make my interactions polite).

1. Hello! I would like to make a product about Woodworking. What do you suggest?
 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Woodworking product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Woodworking product to do.
 7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?
 8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
 9. Now list each bullet point followed by the benefit it gives the user, please.
 10. Please make each bullet point and benefit shorter and more exciting.
- Thank you.

 2. I am really good at (Fill in your skill). Pls apply that to the product idea.
 3. I would like to fine tune it like so: (sell online, appeal to kids, be green, etc). What do you suggest?
 4. I would also like my Zoo product to: (have an affiliate program, be promoted by influencers, etc. If ChatGPT suggests something you have no clue about, ask it how to do it as well).
 5. Now that my product is fine-tuned, how can I create it? Please remember what I am really good at.
 6. Thank you! Pls tell me 10 ways I could find potential customers and remember what else I want my Zoo product to do.
 7. This sounds good. After I create this product, what bulletpoints could I use to make people want it and how many features should I list?

Zoo ChatCPT Product and Money Brainstorming Ideas

8. For each of those bullet points, please provide me with the benefits and then put the whole thing together.
 9. Now list each bullet point followed by the benefit it gives the user, please.
 10. Please make each bullet point and benefit shorter and more exciting. Thank you.
 11. This is great! Another question - I want my website and Zoo products to rank high. What are the top 20 keywords I should focus on?
 12. Please share 20 OTHER ways I can drive traffic to my website.
 13. Thanks! What are some of the BEST social platforms to do the above (especially if my customers are young, old, computer savvy, etc)
 14. Regarding promoting my product, how would email marketing help?
 15. What would be some good call to actions for my product when doing email marketing? (NOTE - if responses are too generic, ask ChatGPT to target suggestions to your product)
 16. Thank you! Next, what would be the best kinds of images to use to market my Zoo product?
 17. What would be the best way to use AI to make those images?
 18. And what would be some good prompts to feed into an AI image generator?
 19. Please provide me with 20 ways people could make money with my product. Thank you!
 20. Can you also tell me where I can go to learn everything about Zoo?
 21. Finally, what do you think my next steps should be, knowing my product is about Zoo?
 22. Thank you for your time! I really appreciate it.

And that is ALL that is required to use ChatCPT to help brainstorm your Zoo product; ask questions and finetune. Remember, ideas are just that. Ideas. It is the actions that count! **Take action and make it GREAT.**
